

Antimicrobial Optimisation Workshop 2018

Wednesday 21 February 2018

UQCCR Main Auditorium

University of Queensland, Herston

	Topic	Speaker
0815-0845	Registration	
0900-0910	Welcome	Jason Roberts
0910-0930	Emerging antibiotic resistance in Asia-Pacific: importance of surveillance and antibiograms	David Paterson
0930-0950	New and old drugs to combat multidrug-resistant Gram negatives	TBC
0950-1010	New approaches to combat Gram positive organisms and <i>C. difficile</i>	Mark Wilcox
1010-1030	What is the role of bacterial genomics and proteomics in antimicrobial stewardship?	Patrick Harris
1030-1100	Morning tea	
1100-1130	Developing and modifying treatment guidelines in an era of resistance and new drugs	TBC
1130-1150	Antibiotic optimisation for treatment of multidrug-resistant pathogens	Jeff Lipman
1150-1210	Combatting antibiotic allergy	Sean Unwin
1210-1245	Antimicrobial stewardship in the Developing World	Natalie Schellack
1245-1330	Lunch	
1330-1410	Designing effective antimicrobial stewardship strategies for different settings	Kathryn Daveson
1410-1510	Is your institution's/unit's antimicrobial stewardship program optimal?	Breakout sessions with tutors
1510-1530	Afternoon tea	
1530-1630	Preventing antimicrobial stewardship 'fatigue' in your institution	Breakout sessions with tutors
1630-1715	Panel Discussion – Persisting challenges in antimicrobial stewardship (e.g. antimicrobial stewardship fatigue, health economics, KPIs, patient outcomes)	Natalie Schellack, Kathryn Daveson, Duncan McKenzie, Andrew Henderson, Sean Unwin
1715-1730	Close	Jason Roberts
1730-1830	Networking Drinks
